

MT3

LS MT 3 tractors - reliable in all conditions

LS Tractor MT3 Series tractors are all about the perfect fit for your needs. Equip your tractor yourself to meet all your expectations

Ergonomic design

The design of LS Tractor tractors is designed with versatility in mind. The LS Series MT3 tractors are compact, extremely efficient and powerful machines for both small and large farms, as well as for specialized companies. These machines will prove themselves in the field, garden, orchard, plantation, transportation and municipal work alike. The use of materials and components of the highest quality guarantees high efficiency during harsh weather conditions or frequent use of the machines. Extensive equipment meets the expectations of even the most demanding farmers.

The LS Tractor MT3 line includes as many as four different tractors, with power ranging from 35hp to 57hp:

- [MT3.35 with 35 hp](#)
- [MT3.40 with 40 hp](#)
- [MT3.50 with 47 hp](#)
- [MT3.60 with 57 hp](#)

Full configuration of your LS Tractor MT3

This Series is special because of the aforementioned ability to customize your LS Tractor.

It is necessary to mention here the various options for additional equipment that can be tailored to individual needs. When ordering an LS brand tractor from this particular series, you rely on the basic equipment provided by the manufacturer. However, you can yourself choose where to mount the safety stays, the type of tires (agricultural, industrial) or the type of transmission (mechanical, hydrostatic). All this in order to best match the machine to the user's preferences and meet his expectations.

Thanks to the tractor's configuration options and the availability of attachments dedicated to LS tractors, [Manage consent](#) be the perfect partner for your work.

Read more about this series on our blog – [Which tractor for 5ha? – LS MT 3](#)

- ROPS trunklid (front or rear) or comfortable, air-conditioned cab
- superior build quality
- power steering
- DPF particulate filter shut-off button
- comfortable, adjustable vibration-absorbing seat
- front axle with sealing, which increases service life in waterlogged terrain

wet brakes

Match perfect equipment

LS Series MT3 tractors are compact, extremely powerful and powerful machines for working on the farm or carrying out municipal work. The use of materials and components of the highest quality guarantees high efficiency during harsh weather conditions or frequent use of the machines. When ordering an LS tractor from the MT3 series, you rely on the basic equipment provided by the manufacturer, you can choose where to mount the safety bar, the version with a cab, the type of tires or the type of transmission. All this is done to make the machine as tailored to your preferences as possible.

Choose the right wheels for your requirements

The choices include:

- agricultural tires
- industrial tires
- grass tires

Cab on LS MT3 tractors

Mounting a cab on the tractor makes it a vehicle that is pleasant to operate all year round regardless of the whims of the weather. LS has equipped its cabs with heating and air conditioning, so the operator will work comfortably in both freezing and hot weather.

The cabs are also equipped with good lighting, which contributes to high visibility of the tractor. Even if tractor work is to be done at dusk or dawn, good tractor lighting will allow comfortable and safe work. Quality windshield wipers and rear-view mirrors are installed on the windows. The cab is protected by a lockable door.

If you choose not to have a cab, a ROPS safety bar will be mounted on the tractor, which protects the operator during accidents from being crushed. You can decide whether the bar is to be mounted behind or in front of the seat.

Transmission

You can choose a hydrostatic (HST) or mechanical (MEC) transmission. The manufacturer has made sure that both versions are operated easily and intuitively. The manual transmission is additionally equipped with a reverser, which definitely makes it easier to operate the tractor. On the other hand, for many users the most important advantage will be the information that the gearbox is synchronized – you can forget about the difficulties of throwing in gears and shifting them. For a group of comfortable users, a much better option will be to choose a hydrostatic transmission, where you use two pedals (forward and reverse) to operate the tractor. It all depends on your preferences!

5-year manufacturer's warranty

Also worth mentioning is the 5-year manufacturer's warranty, which is an added advantage when choosing a tractor from this brand. The long-term warranty swears by the high quality of the product and its solid workmanship. This gives the user peace of mind and confidence that in case of any problems, the manufacturer will be responsible for repairing them.

LS Tractor MT3 tractors are made of high-quality materials and are characterized by solid construction. They are equipped with powerful engines, advanced gearboxes and a number of amenities that enhance comfort. In addition, customizable equipment makes these tractors versatile and effective in a variety of agricultural applications.
