

XU

LS Tractor XU – offers convenience and comfort

Tractors in the XU series are equipped with modern solutions to minimize fuel consumption and optimize performance. If you're looking for a larger tractor that will provide comfortable operation in all conditions, the LS Tractor XU Series models will work perfectly.

They come with a comfortable cab, adjustable seat and ergonomic and easy-to-use features. The XU series engines offer 68 horsepower. In addition, the XU model is offered with mechanical reverse (SS) or hydraulic reverse (PS). In addition to the basic equipment version, the LS Tractor brand also offers an equipment with an auxiliary three-point hitch (EHL), which makes working with additional attachments much easier.

Are you looking for a tractor that provides you with a high level of comfort, safety and precise control? Without a doubt, we recommend the LS Tractor XU series!

These tractors provide precise control and stability while driving which allows safe driving in all conditions. Due to the use of modern technology, noise and vibration reduction, working with the tractor is quiet and comfortable for such a large machine. The hydraulic system (pump capacity of 36.4 l/min), is designed to reduce fuel consumption and achieve optimum performance. The adjustable 4x4 drive uses less fuel when driving on sloping terrain.

LS Tractor XU6168 with mechanical transmission and reverse Synchro Shuttle or Power Shuttle – learn about its capabilities!

The XU6168 model is a modern Premium class tractor. It is equipped with a manual synchronized gearbox with reverse. LS Tractor XU6168 is available in two versions – with a Synchro Shuttle reverse or a Power Shuttle reverse. Depending on the specific nature of the job, you can choose the type of reverse depending on the specific nature of the job and your own preferences. Both types of reversers increase work comfort and make it easier to operate the tractor. The very light-acting pendulum synchronizer lever located on the left side allows you to quickly change the direction of travel in a convenient way. Since the reverser in the Power Shuttle system is hydraulic, it allows you to change the direction of travel without the need to use the clutch. The shift lever is so light that you can operate it with one finger.

Under the hood of this machine there is a powerful 4-cylinder L4CRV-T2 STAGE V diesel engine with a power of 68 HP, which ensures work efficiency in difficult conditions. Additionally, 6 hydraulic outputs in 3 sections allow you to connect a wide range of accessories to the tractor. The equipment of the XU6168 model with a 3-point linkage Cat II with a lifting capacity of 1850 kg allows for versatile use of the tractor.

It is worth noting that the XU6168 tractor offers, as an additional option, an extensive control panel, and electrohydraulic control of the three-point linkage arms (EHL) from the panel position in the operator’s cabin. At the same time, it can be controlled from the outside – on the right fender of the tractor. It is worth noting that thanks to the presence of the right linkage arm control panel, we can perfectly adjust the depth and operating angle of the machine to the ground. This type of equipment allows you to automatically raise the machine when reversing or turning around. Additionally, this tractor has three PTO speeds.

XU 6168 – perfect in its class of tractors

4-wheel drive, an extensive feature system, cruise control and power steering make the XU6168 an ideal machine. In addition to fantastic capabilities, the XU6168 tractor gives us sensational working comfort. A luxurious cushioned, two-stage adjustable seat, a retractable seat belt and high-quality finishes throughout the tractor’s interior make you feel luxurious and, most importantly, safe.

It is a model exceptional with versatility that allows you to work with a variety of attachments.

LS Tractor stand for modernity, high operator comfort and top quality workmanship.

LS Tractor XU6168 is able to meet all needs. It is extremely reliable, and thanks to the use of high-quality materials and state-of-the-art technology, durability and reliability are at the highest level. All this makes it a product that you can benefit from, no matter where you work. LS Tractor XU6168 is sure to give you many years of trouble-free operation.

Quick start

-  68 KM
-  179,2 cm / depending on the type of tires
-  4x4
-  Yes
-  2390 kg (without ballast)
-  Mechanical (MEC)

Welcome to the world of LS Tractor

Specification

Model	XU6168
Engine	4-cylinder liquid-cooled diesel / direct fuel injection
Drive	4x4 4WD
Engine model	LS Mtron L4CRV-T2 STAGE V
Power (hp)	68
Rated motor speed (rpm)	2500
Engine capacity (cm3/ccm)	2505
Transmission	Mechanical Power Shuttle Synchronized
Power steering	Yes
Number of forward/reverse gear ranges	16 / 16

PTO (rear)	3 speeds
	540 rpm / 1710 rpm (540E PTO)
	540 rpm / 2409 rpm
	1000 rpm / 2381 rpm
	Independent PTO/PTO with wet clutch activated by a knob
	3-point / Cat II / Load capacity 1850kg
TUZ	80
Fuel tank capacity (L)	1.2 ~ 29.2 / varies depending on: gearbox, tire type
Driving speed (km/h)	6 / 3 (rear)
Hydraulic system : hydraulic outputs (pcs/number of sections)	Bottom
Trailer hitch	440
Ground clearance (mm)	Agricultural 11.2-20 / 14.9-28
Type of front/rear tires	3100
Turning radius (mm)	Wet
Brakes	1776 / depending on the type of tires
Overall width with tires (mm)	2086
Wheelbase (mm)	Cushioned,
Armchair	Comfortable with a high backrest and armrests
	Adjustable
Weight (kg)	2390 (without ballast)
