

MT5

An exceptional 73 HP under the hood

LS Tractor MT5 is a family of high-class tractors that will certainly appeal to farmers with larger farms. The MT5 Series tractors offer a variety of equipment options so you can tailor the tractor to your needs. If you are looking for a partner that will ensure comfortable work in all conditions, the LS Tractor MT5 series tractors will be perfect.

They are equipped with, among others: In:

- comfortable cabin with 4 pillars, which significantly increases visibility,
- swivel seat with air suspension,
- ergonomic and easy-to-use controls.

Powerful engine – maximum work efficiency

The MT5 model has a powerful, 4-cylinder, liquid-cooled LS Mtron turbodiesel engine with a power of 73 HP under the hood. It guarantees very good operating parameters and high efficiency. Additionally, 6 hydraulic outputs allow you to connect a wide range of accessories to the tractor. The MT5 model is equipped with a 3-point Cat II linkage with a lifting capacity of 3,000 kg and a rear, independent PTO shaft allowing for versatile use of the tractor. In addition, there are three PTO speeds available.

The amenities related to the three-point linkage assistant cannot be omitted – the electro-hydraulic control panel allows for high comfort during work. The electro-hydraulic controls are ergonomically designed and provide comfortable operation. Additionally, the tractor has cruise control and a quick wheel rotation function, which reduces the turning radius and ensures even better efficiency.

Reverse in the Synchro Shuttle or Power Shuttle system – which one do you choose?

The synchronized mechanical gearbox makes the machine easy and intuitive to operate. You can forget about the difficulties of engaging and switching gears. The transmission – with 12 forward and 12 reverse gears – and after the use of a reducer, up to 24 / 24, ensures a wide range of speeds. Thus, it ensures excellent control, precision and safety of work in virtually all conditions.

The MT5 series is extensive when it comes to equipment options. We can choose a tractor equipped with a mechanical synchronized gearbox with reverse – Synchro Shuttle or a gearbox with Power Shuttle reverser. It is an electro-hydraulic reverser that allows you to change the direction of travel without using the clutch. Just a simple movement of the lever is enough to change the driving direction quickly and smoothly.

The MT5 model has a manual clutch button on the shift lever, which allows you to change gears without the need for a clutch pedal. So the clutch pedal is no longer needed when changing gears. The result is a comfortable change of driving direction, greater comfort and increased efficiency.

An additional advantage of the MT5 series is that the models are equipped with crawler gears.

Spacious cabin in the LS Tractor MT5

A characteristic feature of the MT5 series is the interesting design of the cabin. The LS Tractor brand focused on increasing the field of vision by using panoramic windows and only 4 pillars in the cabin. This significantly increases visibility, which can be crucial in some jobs. Equipped with heating and air conditioning, the operator will work in comfortable conditions both in frost and heat. It is also worth noting that the cabin is very spacious, you cannot complain about the lack of space.

Thanks to the use of patented technology, reduced noise and vibration, and good soundproofing, driving the LS tractor is exceptionally quiet and comfortable for such a large machine.

Additionally, high-quality lighting ensures good visibility of the tractor and the operator's work area. Even if work with the tractor is to be performed at dusk or dawn, accurate tractor lighting will allow for comfortable and safe work. The cabin is locked. The standard equipment includes: wide side mirrors ensuring a wide field of vision, which function very well as windshield wipers, as well as a comfortable flat platform and a rubber anti-slip mat. All this for the sake of the driver's comfort and safety.

Welcome to the world of LS Tractor

LS Tractor MT5 in the orchard

Specification

Model	MT5
Engine	4-cylinder liquid-cooled diesel / direct fuel injection
Drive	4x4 4WD
Engine model	LS Mtron L4CRV-T1A STAGE V
Power (hp)	73
Rated motor speed (rpm)	2500
Engine capacity (cm3/ccm)	2505
Transmission	Mechanical synchronized (MEC) / PST
Power steering	Yes
Number of forward/reverse gear ranges	12 / 12 (20 / 20 with crawl gear)
PTO (rear)	3 speeds: 540 / 540E / 1000; (independent PTO/PTO with wet clutch activated by a knob)
TUZ	3-point / Cat. II / Load capacity 3000 kg
Fuel tank capacity (L)	100
Driving speed (km/h)	MEC: 0,2 ~ 32 PST: 0,2 ~ 33
Hydraulic system : hydraulic outputs (pcs/number of sections)	6 / 3 (rear)
Trailer hitch	Bottom
Ground clearance (mm)	459
Type of front/rear tires	Agricultural: 11.2 - 24 / 16.9 - 30
Turning radius (mm)	3959 (3427 with brakes)
Brakes	Wet
Overall width with tires (mm)	1890
Wheelbase (mm)	2150
Armchair	Comfortable, cushioned with a high backrest
Weight (kg)	2997

Key features

- LS Mtron 4-cylinder turbodiesel engine, liquid-cooled, 73 HP
- 3-point three-point hitch Cat. II with a lifting capacity of 3000 kg
- rear, independent PTO with 62 HP turned on and off using a switch
- 3 PTO/PTO speeds: 540 / 750 / 1000 rpm.
- hydraulic outlets: 6/3 at the rear
- mechanical, synchronized gearbox
- Power Shuttle or Synchro Shuttle reverse
- number of gears: 12/12 (24/24 with reducer)
- manual clutch – enables easy and convenient gear changing

large fuel tank – 100 L;
