## FENIX FN

| Parameter                   | FN 3003                        | FN 3503  | FN 4003   | FN 4003 R |
|-----------------------------|--------------------------------|----------|-----------|-----------|
| Working width (m)           | 3                              | 3.5      | 4         | 4         |
| Transport width (m)         | 3                              | 3.5      | 3         | 4         |
| Transport length (m)        | 4.45                           | 4.45     | 4.25      | 4.45      |
| Number of tines (pcs)       | 10                             | 12       | 13        | 13        |
| Max. working depth (cm)     | 35                             |          |           |           |
| Type of tine protection     | shear bolt / horizontal spring |          |           |           |
| Release force (kg)          | 500                            |          |           |           |
| Tine spacing (cm)           | 31                             |          |           |           |
| Tine distance in a row (cm) | 87                             | 87       | 80        | 87        |
| Frame clearance (cm)        | 80                             |          |           |           |
| Recommended output (HP)     | 150– 225                       | 160– 240 | 170 - 255 | 170 - 255 |
| Total weight*(kg)           | 2,500                          | 3,000    | 3,400     | 3,200     |

*\*according to the machine equipment*
