Air Cum Vacuum Relief Valve

Features & benefits :

- Anti-corrosive & chemical resistant feature.
- Straight flow body with large diameter automatic orifice.
- Dynamic sealing prevents leakage under low pressure. conditions (0.1 bar).
- Protecting system by air in & out in combination as per need.
- Avoid water hammer conditions in pipeline.

Applications :

- At header unit & at main & sub-main in micro-irrigation.
- In lift irrigation projects ensuring long life of pipeline.

Available Sizes :

Available in 0.75", 1" & 2" sizes.

Flow. Strength. Reliability.
