Check Valve (Non Return Valve)

KOTHARI IRRIGATION
PROSPERITY FOREVER...!

Features & benefits :

- Made of high grade UV resistant plastic which ensures long life.
- Very important valve in all types of micro irrigation & pipeline systems for long life of the system.
- The spring & float mechanism gives highest life in its class.
- Used to avoid backflow of water after switching off of the pump.
- This valve allows water flow only in one direction.
- The dismantling of the valve is possible.
- 0.5" Bypass connection & 0.5" plug bush provided for additional safety of the valve.
- This valve plays an important role in increasing system life.

Available sizes :

available in 2", 2.5" & 3" size in PN-6 with threaded & flanged connection.

Flow. Strength. Reliability.
