

# ERO-Grapeliner 8000

The basis of a good wine can be found in the vineyard. That's why we focused on the quality of the harvest when developing the Grapeliner 8000.

Our tried-and-tested three-stage grape cleaning system, integrated with the newly PROselect destemmer and PROselect+ a larger sorting table ensures the best quality fruit at maximum yield.

Thanks to the patented automated self-levelling system, the grapes are distributed evenly across the PROselect+ sorting table, delivering a perfectly sorted crop even when working on gradients up to 35%.

Sustainability, boosted efficiency and even higher operator comfort: three more reasons the Grapeliner 8000 is at the top of its class. The new series of grape harvester features low fuel consumption, thanks to a state-of-the-art AGCO Power engine. The intuitive user interface with specially developed in house software is easy to operate.
