

ERO Trimmer ELITE VIEW

The ELITE View Trimmer is a perfect example of customer-focused product development at ERO. ERO developed this product in response to the need expressed in various markets for better visibility for the driver, a low center of gravity, and the need to work on terraced as well as uneven terrain.

The ELITE View Trimmer is mounted low on the tractor chassis. Lift masts are mounted on the left and right side of the standard hydraulic width offset positioned low on the tractor which carry the cutter beams. This ensures that the view directly in front of the tractor remains unobstructed.
