

ERO Defoliator VITIpulse DUO

The ERO VITIpulse DUO 300 is the new and improved ERO VITIpulse. Like the original VITIpulse, it offers the advantages of contactless defoliation and targeted yield adjustment using pulsed bursts of air.

However, the VITIpulse DUO now combines two pulsed-air blowers with four nozzles altogether in a single working head. It can be adjusted to use two or four nozzles, depending on the application.

As a result, the DUO can achieve much greater working speeds than the single-blower system (VITIpulse). The angle of the working head can be adjusted to configure the defoliation height.
