

ERO EB 490 Professional

The ERO Defoliator EB 490 Professional is the further development of the world's best-selling defoliation system. Two rotating rollers remove leaves drawn in by a suction fan without damaging flowers or grapes, allowing operation from flowering through to harvest.

The optimized picking unit and increased fan capacity provide excellent defoliation results even at higher travel speeds and in wet foliage. Different sensing systems allow optimal adaptation to varying vineyard conditions.

Its robust design, high working capacity and simple operation make the EB 490 Professional an efficient solution for professional defoliation.
